

For fun-lovers, adventurers and fitness buffs alike. The ultimate environmentally-friendly watercraft or training equipment.

Whether you're up for some fun, off exploring, or into a solid workout, these sleek, stable and seaworthy row boats require a minimum of skill to learn. Master the basics in an afternoon.

All ROW boats are:

- **Fast.** Capable of greater speed than the average sea kayak.
- **Stable and secure.** Rugged and reliable in almost all weather.
- **Easy to row.** Thanks to the sliding seat, the almost 3-metre long carbon fibre laminated oars and our streamlined hull design.
- **Easy to transport.** On your car with a standard roof-rack or with a dolly on land.
- **Designed to keep you dry.** Optimized length and the sleek, high bow and stern ensure a dry ride. Double hull flanges reduce spray to a minimum.
- **Built with an integrated aluminum keel.** Providing greater hull protection.
- **Equipped with a multifunction bow eye.** Set in the hull at the ideal height for safe towing and mooring. Can be combined with our anti-theft boat-locking cable.
- **Genuine Swedish quality.** Designed, developed, tested, and hand-built in Sweden by proud people who really care.

An excellent full-body workout. Thanks to the rolling seat, leg-power drives most of each stroke. With arms, shoulders and back following the motion, the result is a more evenly distributed load across the body.

ROW

For adventure, fitness or just pure fun... the environmentally-friendly watercraft or full-body workout you've been waiting for.

www.rowing.life

Rowing is more than just a fantastic way to stay fit. It's a fun way to invest in your healthy lifestyle.

Rowing with rolling seats, out-rigged with carbon-fibre oars, set on a sleek, fast hull—takes it to a whole new level. More than a great full-body workout, it's a beautiful way to have fun while staying in shape.

Rowing can take many forms. Rowing for exercise, coastal and adventure rowing, single or double... it's up to you to choose which fits with your dream. Regardless of your age, body size or level of fitness, rowing is a skill you can learn in less than an afternoon.

Match rowing with your personal need for everything from family fun in the sun, to knee injury rehabilitation, to the ultimate full-body workout or all-out adventure exploring.

Created by Wim Kotzé together with boat designer Hans Friedel, the unique designs are based on competition rowing sculls. Exceptionally fast and extremely stable, they let you leave the restricted confines of calm bays and glassy seas behind, inviting you to push the limits and explore new horizons—confidently and safely.

ROW eXplorer 4.6

Single or double rowing with space for passengers

Simple and minimalistic by design, the **ROW eXplorer 4.6** is a sliding-seat recreational row boat for single and/or double rowing. Seaworthy, quick, stable and easy to handle, it offers ample space for passengers, dogs or equipment for a rowing adventure. Flotation is ensured through bow and stern watertight compartments. **ROW eXplorer 4.6** is delivered as a single that can be upgraded for double rowing. Just add an extra unit for the forward rowing position plus a pair of oars. The conversion from single to double and back again is done within minutes.

Specifications
 Length: 4.69 m (15.38 ft)
 Beam: 1.15 m (3.77 ft) hull only
 1.67 m (5.48 ft) with riggers
 Weight: 32 kg (70.55 lbs) hull weight
 39 kg (86 lbs) with riggers & seat
 Load capacity: Protected water = up to 3 persons
 Buoyancy: Watertight compartments in bow and stern
 CE Category: "D"

ROW Scull

The ultimate all-weather rowing machine

The **ROW Scull** coastal craft is a modern recreational row boat, designed and built in the classic "Whitehall" style and with a great deal of inspiration from surf boats. The boat is self-bailing through scuppers on the deck and a valve in the foot well. **ROW Scull** is seaworthy, fast and safe, with a rowing performance that inspires coastal adventures or just rowing in unprotected water. It is perfectly suitable for a workout in almost any weather condition. A 110 litre watertight compartment under the foredeck will keep your gear safe and dry during the trip. Folding / re-moveable riggers makes for easy transportation, storage and handling.

Specifications
 Length: 4.68 m (15.35 ft)
 Beam: 1.16 m (3.80 ft) hull only
 1.68 m (5.51 ft) with riggers extended
 Weight: 32 kg (70.55 lbs) hull weight
 9 kg (86 lbs) with riggers and seat removed
 Load capacity: Load capacity: 1 person + 80 kg (176 lbs)
 Buoyancy: Double hull and 110 litre watertight stowage
 CE Category: "D"

ROW VagaBond 4.7 Touring

The training or adventure specialist

Equally well adapted to your rowing workout or rowing expedition, the **ROW VagaBond 4.7 Touring** boat is an extreme seaworthy craft, ideal for an active outdoor life. Safe, stable and adapted for rowing in lumpy seas, the **ROW VagaBond 4.7** is self-bailing and equipped with 3 watertight compartments. Stowage possibilities are plentiful, large enough for long and self-sustained expeditions. Storage space for heavier equipment underneath the cockpit keeps the weight low and centered. The bulkhead-mounted compass is standard. It's a highly capable craft tried and tested over many expeditions. And beautiful too.

Specifications
 Length: 4.71 m (15.45 ft)
 Beam: 1.15 m (3.77 ft) hull only
 1.67 m (5.48 ft) with riggers
 Weight: 46 kg (101.4 lbs) complete with riggers & seat
 Load capacity: 1 person + 100 kg (220.4 lbs) = open water
 Buoyancy: 800 litre, 3 watertight compartments + self-bailing
 CE Category: "C"
